MODEL 3080RC - CONTINUOUS ROPE CUTTER AND SEALER

OPERATING INSTRUCTIONS

1. Keep working area WELL VENTILATED at ALL TIMES.
2. Wear a SAFETY MASK (if possible) as Semi-Toxic or unpleasant fumes can be given off when cutting some materials. It is best to assume that all MATERIALS have TOXIC FUMES and SAFETY is the best protection.
3. Take Great Care as the CUTTING BLADE gets "RED HOT" when in use and could cause "VERY SERIOUS BURNS" if accidentally touched. Also the CASE gets quite hot so be CAREFUL and avoid touching it at all times.
4. Spare Blades are available from your supplier or direct from your agent.
5. Service, (if required) is available through your suppliers.
6. Do NOT leave turned on when not in use.
7. Keep unauthorised personnel out of the work area.
